

Bio's and Photos of IPOMS Committee Nominees September 2021

Dr Pádraig Ó Scanaill

Pádraig Ó Scanaill is a graduate of the National Anaesthesia Training Programme in Ireland. He has completed postgraduate fellowships in Perioperative Medicine, Liver Transplant and Cardiac Anaesthesia in the UK. Pádraig's interests include medical education, critical care medicine and the delivery of perioperative care to the high-risk surgical patient. Pádraig currently works as a locum Consultant Anaesthetist at the Mater Misericordiae University Hospital, Dublin, Ireland

Dr Andrea Haren

Andrea is a Consultant in Intensive Care and Anaesthesiology at St Vincent's University Hospital, Dublin. A graduate of the National Anaesthesia Training Programme in Ireland, she completed a post graduate fellowship in perioperative medicine at University College London Hospitals. Her areas of interest are perioperative critical care and optimising the care of the older person undergoing surgery. She is a founding member of the Irish Perioperative Medicine Society and has helped to develop the first perioperative medicine fellowship in Ireland.

Dr Aislinn Sherwin

Dr. Aislinn Sherwin is a Consultant Anaesthesiologist at St. James Hospital, Dublin. She is a medical graduate of the Royal College of Surgeons in Ireland and an Anaesthesiology graduate of the College of Anaesthesiologists, Ireland. She also holds a Bachelor's Degree of Science in Physiotherapy and a Masters in Healthcare Ethics and Law. She has completed Fellowships in Perioperative Medicine and Onco-Anaesthesia in Peter MacCallum Cancer Centre, Melbourne and in Trauma and General Anaesthesia in the Royal Melbourne Hospital. She was also the first Onco-Anaesthesia Fellow in the Mater Misericordiae University Hospital in 2018-2019. Her areas of interest are in perioperative medicine and prehabilitation for the cancer patient and as well as shared decision making and open disclosure

Ms Orla McCormack

surgeon at the Mater hospital.

Orla McCormack trained at U.C.D. and the Mater Misericordiae University hospital. She completed higher surgical training in Ireland focusing on oesophagogastric surgery followed by a 1-year international fellowship in laparoscopic oesophagogastric surgery at the Princess Alexandra hospital in Brisbane. She was appointed to the Royal Infirmary hospital in Edinburgh and spent a year performing oesophagogastric, general and complex hernia surgery. In 2016 she became a consultant at the Royal Marsden Hospital in London doing oesophagogastric cancer resections. She spent almost 2 years there prior to returning to Ireland as a general/ upper gastrointestinal

Dr Kim Caulfield

Kim is currently a Locum Consultant Anaesthesiologist at University Hospital Waterford. She completed her anaesthetic and intensive care medicine training with the College of Anaesthesiologist of Ireland in July 2018. She recently completed a Perioperative Medicine Fellow at UCLH, and is concurrently completing the University College London masters in Perioperative Medicine. She has a vested interested in High Risk Anaesthesia for both elective and emergency surgery, with a particular focus in Obstetric Anaesthesia having completed a High-Risk Obstetric Anaesthesia Fellowship at the Royal Women's Hospital in Melbourne in August 2019. Her main interest in perioperative medicine is in the appropriate preoperative optimisation of patients, shared decision making and the PACU model of care postoperatively.

Dr Siobhan Clarke

My name is Siobhán Clarke. I am in my second year of the Anaesthesiology training scheme and currently based in the National Maternity Hospital, Holles Street. When I'm not in the hospital, you'll find me outdoors in some capacity; swimming, cycling, hiking or running! My interest in perioperative medicine is in equal parts practical, political and academic. With more people on surgical waiting lists in this country than even before the speciality has never been more relevant. Drawing inspiration from other countries, it's clear that much can be done to mitigate preventable morbidity and mortality in the perioperative setting by incorporating a structured and standardised approach to patient management before, during and after surgery. As a junior anaesthetic trainee, I feel I am best placed to reach out to peers across a wide range of medical and surgical specialities with a view to promoting perioperative medicine.

Dr Aoife Lavelle

My name is Aoife Lavelle. I'm currently a locum Consultant anaesthesiologist in St James's Hospital, where I started working in July 2021. Prior to this I worked as a Consultant Cardiothoracic anaesthesiologist in St Bartholomew's Hospital, London. I have completed three post-CCT fellowships, two in cardiothoracic anaesthesiology split between Bart's and Harefield Hospital and a difficult airway fellowship split between St James's Hospital and the Royal Victoria Eye & Ear Hospital. This fellowship also incorporated a simulation fellowship through the College of Anaesthesiologists. My interests in perioperative medicine include prehabilitation and enhanced recovery after cardiac surgery.

Ms Naomi Fearon

I am an Irish surgical trainee currently undertaking a Bariatric Surgery fellowship in Southmead Hospital in Bristol, UK. This role encompasses a broad operative experience as well as becoming familiar with all aspects of the multi-disciplinary work up and enhanced recovery including a '23-hour discharge'. My interests include peri-operative care of patients with obesity, optimisation of surgical outcomes and medical education. I am hoping to come back to work in Ireland after my fellowship. When not at work I am usually either cycling, rowing or on the hunt for a good coffee.
